² Findings are limited to projects with estimated total cost at completion of \$100,000 or more for research space. Estimates are prorated to reflect research components ¹ The original group consists of the 29 HBCUs also surveyed in 1988, 1990, and 1992; the expanded group is the 1992 and 1994 population of all 70 research-performing HE

Because of rounding, components may not add to totals.

Dollar amounts are reported in current dollars, unadjusted for inflation. See Table A-5 in the Technical Notes for the inflation adjustment used in Volume I of this report. NOTES: All 1994 data are national estimates derived from samples representing the 565 largest research-performing U.S. universities and colleges; all previous years data (1988, 1990, and 1992) represent 525 institutions.

KEY: "NASF" = net assignable square feet; "-" = data not collected
